SUMMARY

Product Designer (UX/UI) with 5+ years across B2B SaaS, Web3 platforms, marketplaces and consumer mobile apps. Turns complex products into clear, usable systems: from gathering input across teams and prioritising the roadmap to research, design systems and developer handoff. Works confidently with data (GA4, A/B tests, SEO/GEO) and with AI-assisted design workflows (Claude Code, Figma MCP).

EXPERIENCE

Product Designer (Contract) — Care for Kids, Highwatch AI — 2026

- Care for Kids (childcare marketplace, Australia): gathered requests from Sales, Marketing and an SEO agency, prioritised them by impact and effort against four leadership priorities, and turned them into an 8-week roadmap in the first 3 weeks
- Built a design system for the B2B provider portal with an AI-assisted workflow (Claude + Figma MCP), applied it across ~24 existing screens, and redesigned dashboard and reporting concepts with the Sales team
- Audited the marketing website for SEO and AI-search readiness (GEO), designed landing pages informed by GA4 analysis, and uncovered bot-skewed traffic that reshaped the A/B testing plan
- Highwatch AI (enterprise insurance SaaS): designed data-heavy workflows, from extraction review and decision screens to audit and analytics centers, with role-based task logic for underwriters and managers

Product Designer — Cobalt Creative Agency — Aug 2025 – 2026

- Redesigned product page structure for e-commerce brand projects, reducing drop-off by 15% for one of the agency's largest clients
- Translated business requirements into optimized user flows and layouts for Shopify-based projects, backed by CRO audits

Product Designer, UX/UI — Evadav Traffic Group — Nov 2024 – Aug 2025

- Designed across a portfolio of iOS and Android consumer apps, including VPN, tracker, calorie-calculator, AI plant-care and crypto-trading education apps
- Launched a tournament/leaderboard feature (+25% engagement), redesigned and personalized onboarding (−20% drop-off) and redesigned a paywall (+18% purchase conversion, A/B tested)
- Built a design system adopted across multiple mobile apps, improving UX consistency and cutting duplicated UI work

Product Designer (Contract) — Jun 2024 – May 2025

- Delivered design work across concurrent client engagements: EcoEquity (B2B carbon credit marketplace, Web3), Vitura Health (website rebuild with React & Strapi CMS), WinSoft (UX research and delivery) and Qualoo (mobile network-diagnostics app)
- Simplified EcoEquity's complex transactional flows and data visualizations for technical and non-technical users
- Redesigned Qualoo's core flows, simplifying multi-step processes and introducing gamified elements, increasing flow completion by 30%

Product Designer — BlockTrust — Nov 2022 – Apr 2024

- Designed Collector's Hub for Colt CZ Group end to end: exclusive auctions, a marketplace of purchase rights and digital certificates of ownership
- Turned complex blockchain logic into accessible dashboards and user flows, and built a design system from scratch with reusable components and documented tokens

UX/UI Designer — SupportYourApp — Jul 2021 – Nov 2022

- Produced brand books and design guidelines, and redesigned internal websites for better usability and consistency

EDUCATION

Beetroot Academy — Front-End Dev, 2024 · **Groward Academy** — UX/UI Design, 2020 · **NTU «KhPI»** — Bachelor's Degree, 2017

SKILLS

UX & Product: Wireframing, Interaction Design, Information Architecture, User Flows, Prototyping, UX Research, Usability Testing, Roadmapping & Prioritisation, Stakeholder Management

Design Systems: Figma (Auto Layout, Components, Variables), Design Tokens, Component Libraries, FigJam
